

Technical Data Sheet – Protec Guard Sheet

Protec Sheets are made from Impact Co-polymer of Polypropylene. It is an extruded hollow profile consisting of two flat walls connected by vertical ribs. Sheets are produced by state of art profile extrusion plant **Protec Guard Sheet** sheets are strong, light weight, water proof, chemical proof, vermin proof, and food grade. It can be fabricated easily using paper board converting machineries. The sheets are corona treated on both sides and has good printability. The salient feature of the sheets make it suitable for wide range of uses. Advertising, Packaging etc.

Properties

Sheet thickness 3-3.5 mm
Weight - 500 gms/sqm
Material - PP
Colour - Yellow
Corrugation on the inside
Smooth surface outside
